

Principles of the felling programme
 Arboricultural works in accordance with Woodland Management Plan is to clear fell woodland areas W1 & W2 in blocks over a 16 year felling programme.
 Felling to be carried out in 4 phases with 25% of trees being felled in each phase subject to survey and Health & Safety
 Refer to the Schedule for Management and Maintenance document 6103 MS 01 D & WOODLAND MANAGEMENT PLAN for detailed schedule of phased works
 Refer to the Woodland Planting Scheme Dwg. No. 6103 - WPS 01 Revision B for planting schedule
 Woodland proposals updated following meeting and site visit with Norwich City Council (NCC) Planning & Tree Protection Officer on the 1st & 2nd November 2012

Tree group numbers with reference to:
 City of Norwich Tree Preservation Order 369
 G1 / G2 / G3
 W1 / W2
 City of Norwich Tree Preservation Order 36
 G4

NOTES

Arboricultural Notes
 Arboricultural works are to be carried out by a qualified Arboricultural Contractor in accordance with B.S. 3998 (2010) or updated standard at time of works.

Felling to be carried out in 4 phases with 25% of woodland trees being felled in blocks i.e. approximately 45 - 54 trees of the 196 trees that make up W1 & 20 - 24 trees of the 84 trees that make up W2 at each phase.

The block felling of trees is to be annually assessed with regard to Health and Safety by way of a Tree Hazard Assessment.
 The overriding factor with the re-structuring & felling programme is the Health & Safety of the trees and Public Safety.

All works to individual trees or within the woodland areas, subject to the Tree Preservation Order, shall be carried out in consultation with NCC and appropriate application for works.

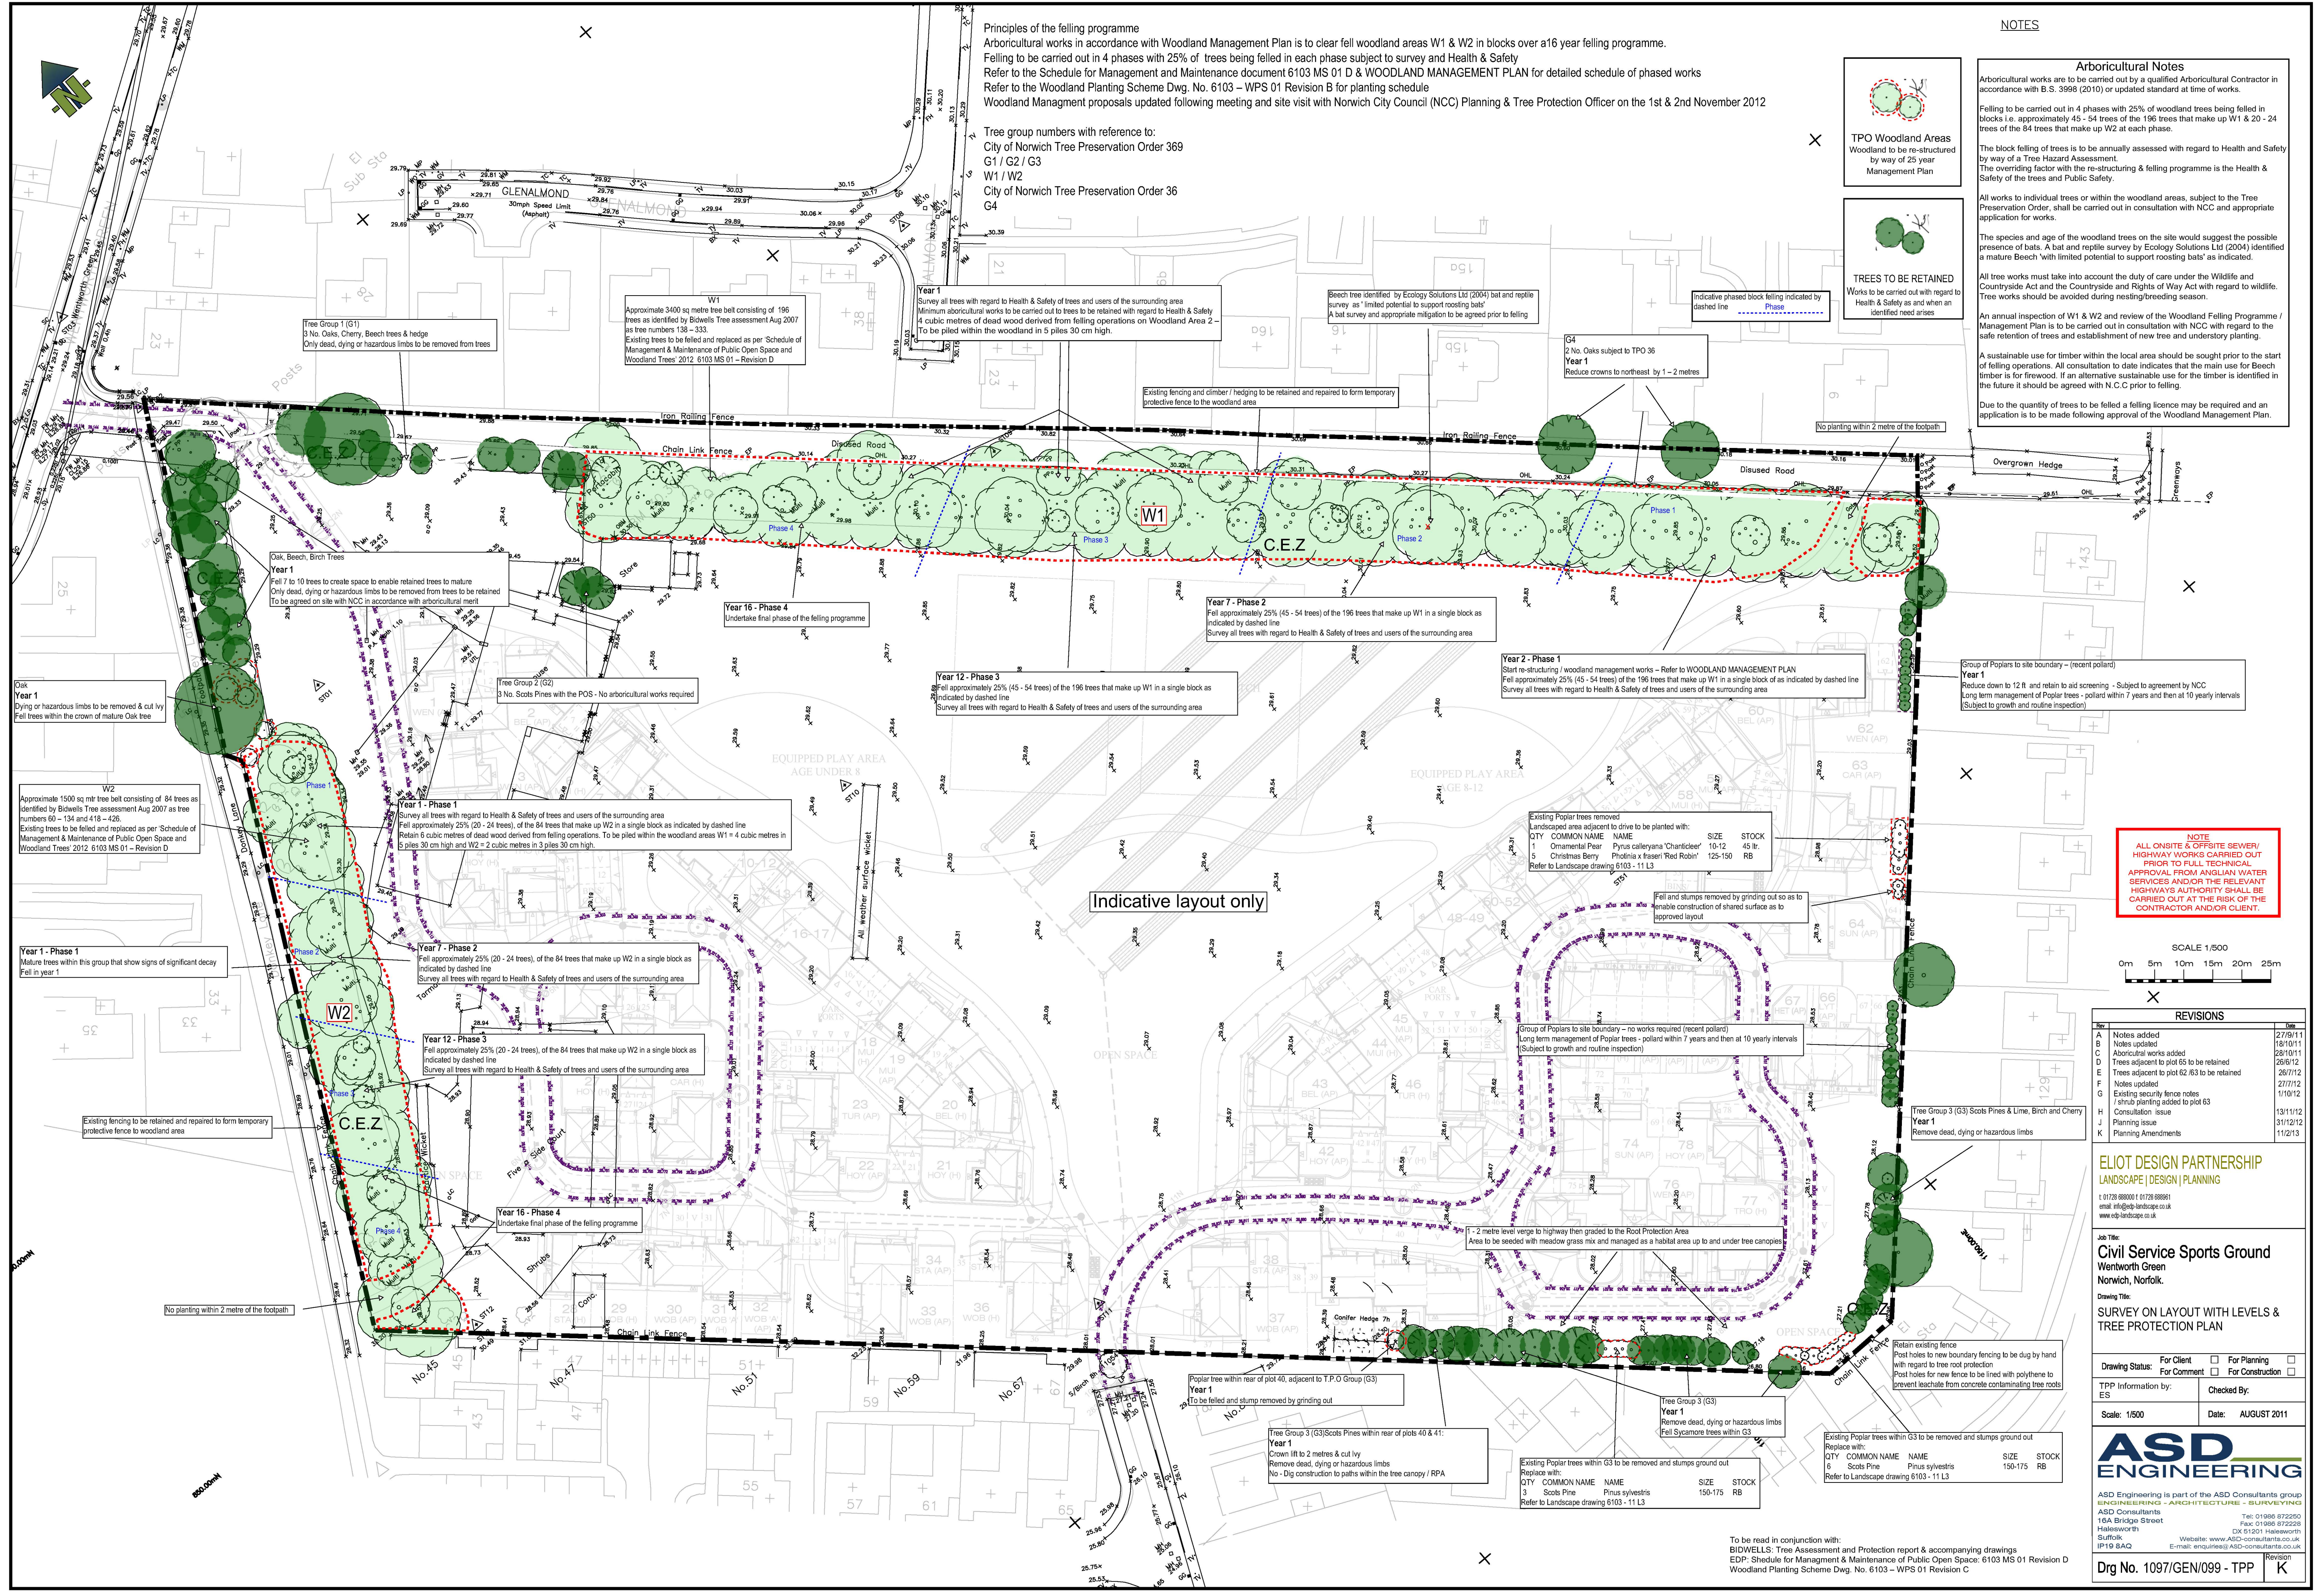

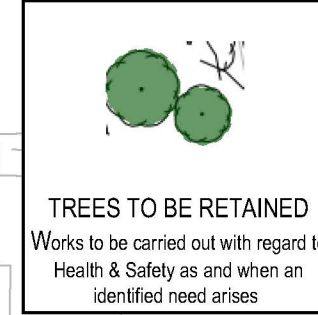

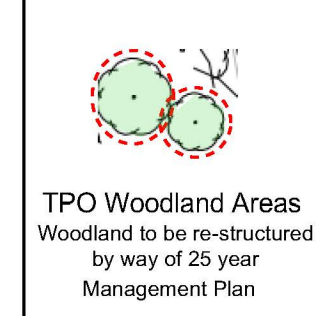

The species and age of the woodland trees on the site would suggest the possible presence of bats. A bat and reptile survey by Ecology Solutions Ltd (2004) identified a mature Beech with limited potential to support roosting bats' as indicated.

All tree works must take into account the duty of care under the Wildlife and Countryside Act and the Countryside and Rights of Way Act with regard to wildlife. Tree works should be avoided during nesting/breeding season.

An annual inspection of W1 & W2 and review of the Woodland Felling Programme / Management Plan is to be carried out in consultation with NCC with regard to the safe retention of trees and establishment of new tree and understorey planting.

A sustainable use for timber within the local area should be sought prior to the start of felling operations. All consultation to date indicates that the main use for Beech timber is for firewood. If an alternative sustainable use for the timber is identified in the future it should be agreed with N.C.C prior to felling.

Due to the quantity of trees to be felled a felling licence may be required and an application is to be made following approval of the Woodland Management Plan.

Indicative layout only

NOTE
 ALL ONSITE & OFFSITE SEWER/HIGHWAY WORKS CARRIED OUT PRIOR TO FULL TECHNICAL APPROVAL FROM ANGLIAN WATER SERVICES AND/OR THE RELEVANT HIGHWAYS AUTHORITY SHALL BE CARRIED OUT AT THE RISK OF THE CONTRACTOR AND/OR CLIENT.
